

Fully Assembled Conveyor Pulley's

Save time and money with *Martin* being a "One-Stop-Shop"! Complete Conveyor Pulley assemblies that are ready to drop-in!

Advantages

- Complete Assembly Installation, Shaft, Bushings, Bearings, Backstop, & Couplings
- Competitive Packaged Pricing "One-Stop-Shop"
- Access to All the Major Bearing Manufacturers
- Stock on Most Common Sized Bearings
- Cost Savings

Pulleys assembled with bearings and shafts are "ready to drop-in", saving time and money!

Secured Proper Installation

- Bushings & Bearings are installed indoors in a clean environment rather than field installation
- All assemblers in shop are trained by all major bearing manufacturers for proper installation techniques

Add-Ons

- Long term storage options
 - » 100% grease filled bearings, 50% grease filled housings
 - » UV Wrap on pulley
 - » Steel Pulley Cradle
 - » Statically Balanced Pulleys
 - » Stress Relieved pulleys and shafts
 - » Identification tags

Disclaimer

- Bushing bolts should be re-torqued before pulley installation
- After long term storage; bearing rolling elements and housings should be cleaned out and re-packed with new grease
